

PROTECT UNDERFLOOR HEATING SYSTEMS WITH SENTINEL

Unprotected underfloor heating systems can suffer from a number of problems, from blockages to system breakdowns.

Sentinel X700 Biocide and X100 Inhibitor provide the complete solution for protection of underfloor heating systems and air source heat pumps.

BS7593:2019 and Part L of the building regulations recommends biocide to be used when the system water temperature is under 50°C.

X700 Biocide

Provides protection against biological and fungal build up that can appear in underfloor heating and air source heat pump systems due to lower operating temperatures

Prevents:

- Blockages
- Unpleasant smells
- Corrosion
- Poor heating efficiency

X100 Inhibitor

Provides protection against corrosion and limescale build up, extending the life of the system, ensuring maximum efficiency and minimising fuel usage

- Boiler and heat pump manufacturer recommended
- Unique anti-corrosion formulation
- Keeps system water pH neutral
- Trusted by plumbers for over 35 years
